Re: **Ellsworth Industrial Park
Lovejoy's Work to Date in Support of EPA's Conceptual Site Model;
Ongoing Participation in Response to Special Notice Letter**

Dear Mr. Krueger:

Per our conversation yesterday, we are enclosing Lovejoy's spreadsheet that details its investigation of additional properties in Ellsworth Industrial Park (the "Site"). Since receiving its Special Notice Letter for the RI/FS work in late December 2004, Lovejoy has actively participated in Steering Committee activities. Lovejoy has e-mailed their completed signature page for the Administrative Order on Consent ("AOC") to the Steering Committee for submittal to you.

Lovejoy's Analysis of Potential Additional Sources at the Site

In addition, we asked our Firm's consulting expert to begin the work that will be needed during the development of the Conceptual Site Model ("CSM") and Work Plan to identify all potential sources of releases at the Site. It is extremely important to identify all sources so that EPA's investigation will be a final investigation with all appropriate information. Unless all potential sources of releases are fully investigated during the RI/FS, there will be no closure on these issues. During the pending litigation, including the toxic tort cases in State court and the federal class action, all of the defendants, including Lovejoy and the other signatories to the pending AOC, will attempt to identify other liable parties at the Site and bring them into the lawsuits.

In other words, unless they are truly comprehensive, the CSM, Work Plan and resulting RI/FS will not be the last word, and in fact they will be rigorously challenged and undermined. Thus all parties, including EPA, need to work together to produce the best possible CMS, Work Plan and RI/FS so that the Site is truly finished when EPA says so. You will see that our consulting expert's spreadsheet provides the sources of information used, such as 104(e) responses, Weston reports, and public databases, and examines potential sources at the Site on a property-by-

Thomas J. Krueger, Esq.

Page 2

property basis. We believe this level of detail is necessary so that EPA's technical experts can perform their own independent technical review and make their own judgments. We and our consultant are available to discuss this information with you at your convenience after EPA has had an opportunity to review it.

Steering Committee's Unfair Tactics

As we discussed, the Steering Committee is demanding more than \$400,000 from Lovejoy based on Lovejoy's "non-participation" in the 2003 AOC. This payment demand claims that unless we pay the Steering Committee, EPA will view Lovejoy as a recalcitrant (liable for all unpaid EPA and other costs regarding the work the 2003 AOC participants performed under that AOC). In short, the Steering Committee is attempting to coerce unfair financial terms and claims to speak for EPA in enforcing such inequity.

As a practical matter, Lovejoy could not have participated in this remedial work, which has long since been completed. Lovejoy never received a Special Notice Letter, nor were they otherwise asked to participate. Fairness may or may not warrant a catch-up payment by all of the later-identified PRPs who were not asked to participate in 2003, but for many reasons, the Steering Committee's demand is totally wrong. For example:

- * The 2003 Steering Committee has imposed its highly unscientific, questionable allocation formula on Lovejoy and other new PRPs.

- * The Steering Committee's allocation formula is based on the Weston Reports, which were initial EPA investigative tools and not ever intended to be the basis for a PRP liability allocation formula.

- * The allocation formula has only three levels – 1, 2 and 3. Even interim CERCLA allocations include many more levels of participation and are based on additional factors, such as a PRP's actual solvent usage as documented in 104(e) responses. The manifest unfairness of this Steering Committee approach does not survive scrutiny under CERCLA litigation precedent.

- * Many participants in the pending RI/FS AOC already feel burdened by this allocation formula. Lovejoy, and undoubtedly others, will demand a more accurate and realistic allocation as soon as the RI/FS data becomes available.

- * Since EPA anticipates having data by late winter / early spring, and since we fully expect that the RI/FS work will identify additional PRPs, it is totally inappropriate for the Steering Committee to preempt EPA and try to impose an unfair, soon-to-be-outdated allocation on Lovejoy. Indeed, EPA's CERCLA policy is to independently ensure that such potential injustices are carefully reviewed, and the data to do so will soon be available.

Thomas J. Krueger, Esq.
September 9, 2005
Page 3

The Steering Committee's monetary demand is an inappropriate, arrogant tactic and we propose to address this issue once EPA finishes the RI/FS. The purpose of the RI/FS is to find where the waste is actually located. Until that happens, further allocation is premature. We understand the government is willing to have a role in the allocation process and Lovejoy welcomes such EPA role. As noted, a number of PRPs, including members of the Steering Committee, will want to reshape the allocation based on the RI/FS. In the meantime, the RI/FS is the only proceeding in which EPA has asked Lovejoy to participate, and as noted, Lovejoy has completed its signature page for the RI/FS AOC and sent it to the Steering Committee for submittal to EPA. Further, as shown by our voluntary investigative work, Lovejoy is a very pro-active participant who has solely assumed the cost of searching for other potential solvent users at Ellsworth Industrial Park.

Thank you for recognizing that Lovejoy is actively participating in the RI/FS, and we hope that you find our consultant's research to be helpful. Lovejoy will continue to play a positive and productive role. We ask that you make it clear to the Steering Committee that EPA alone speaks for EPA and that you have not made the Steering Committee an independent surrogate for governmental decisions on who is to be adjudged a "recalcitrant" and then punished. We look forward to working with EPA in achieving our mutual goal of obtaining a complete and comprehensive identification and investigation of the Site.

Sincerely,

A handwritten signature in dark ink, appearing to read "Russell B. Selman", written in a cursive style.

Russell B. Selman
